

This folder contains the following files:

1. `stage_races_nf15.xlsx`: This file contains a list of the top 15 finishers of the stages of the stage races mentioned in the paper together with stage and rider characteristics.
2. `one_day_races_nf15.xlsx`: This file contains a list of the top 15 finishers of the one-day races mentioned in the paper together with stage and rider characteristics.
3. `itts.xlsx`: This file contains a list of individual stages in the XXX file that need to be excluded due to the fact that these stages are individual time trials. This exclusion happens in the datafile under the section XXX.
4. `EEREV-D-24-00439R2_replication_code.pdf`: This pdf contains the python-code to replicate all regressions in the main text and the appendix using the provided datasets (points 1, 2, and 3). It also includes, as comments and headlines, explanations on which part of the code does what.
5. `EEREV-D-24-00439R2_replication_code.ipynb`: This Jupyter Notebook contains the python-code to replicate all regressions in the main text and the appendix using the provided datasets (points 1, 2, and 3). It also includes, as comments and headlines, explanations on which part of the code does what. The code can be run in Jupyter if the ipynb file is in the same folder as the excel-files with the dataset.
